INTRODUCTION

In conjunction with the World Radiography Day which is on 8 November 2018, the department of Medical Imaging in MAHSA University is going to organize an Emergency and Trauma Imaging conference aiming to enhance multi modalities patient management and skills to detect common injuries, acute polytrauma and other emergency life threatening medical condition.

This two days event will provide the radiographers and student radiographers up-to-date with the latest multi-modalities imaging trends and the challenges of managing emergency and trauma cases. The program provides coverage on the principles of emergency and trauma imaging, radiation protection, role of the advance imaging modalities in emergency and trauma imaging as well as radiographers responsibilities in managing emergency and trauma cases. This is a high quality and cost effective CPD event that provides great opportunity for participants to acquire or regain knowledge on Emergency and Trauma Imaging and also be exposed to interesting clinical cases presentation. This conference also serves as a platform for participants to meet with international colleagues and discuss new and challenging aspects of Emergency and Trauma Imaging.

OBJECTIVES

1. To enable radiographers to acquire knowledge on multi-modalities emergency and trauma imaging.
2. To apply emergency and trauma imaging principles when managing acute polytrauma and other emergency life threatening medical condition.
3. To encourage participation in discussion on special clinical cases presentation.
